SAMPLE · DECEMBER 2026

Household Safety Notes

A done-for-you monthly client newsletter for independent insurance agencies, sent under your agency's name.

What's in each month

- One ready-to-send email issue (HTML, plus plain text) on household risk and scam safety, with sources cited.
- 8 social posts: captions plus 1080x1080 image cards with space for your logo.
- Placeholders for your agency name, logo, agent name, phone and address, so it reads as coming from you.
- Delivered to you by email on the 1st of each month (the December issue by December 1). You send it from your own email tool; we never email your clients.

This sample includes

- Pages 2-4: the December issue, "Holiday scam season: 6 quick checks for your household."
- Pages 5-6: the 8 December social posts.

Review before you send. Your agency is the sender. Please check every issue and post against your state's insurance advertising rules and any carrier or agency-network policies before using it. The content is general safety information only. It is not insurance, legal or financial advice and makes no statement about any policy or carrier.

Founding member offer

$29 per month, cancel anytime. Founding members get the December issue ready to send, with their agency name and logo filled in, by December 1, then a new issue and social pack on the 1st of each month. This sample is free to review. Details: cyberdad2025.github.io/agents/

Holiday scam season: 6 quick checks for your household

Hi {{FIRST_NAME}},

December brings more packages, more online orders and more texts about both. Scammers know it. Below are six checks that take a few minutes each and make your household a harder target this month. None of them cost anything.

By the numbers

People reported losing **$15.9 billion** to fraud in 2025, from about 3 million reports to the Federal Trade Commission.[1] The FBI's Internet Crime Complaint Center logged just over **1 million complaints** and **$20.9 billion** in reported losses in 2025; people 60 and over reported about **$7.7 billion** of that.[2] The FTC notes that many losses are never reported.

1. "Your package couldn't be delivered." Don't tap the link.

Fake delivery texts copy the Postal Service, FedEx, UPS and others. The link leads to a look-alike site that asks for a small "redelivery fee" and takes your card number. If you're expecting a package, check its status on the site or app where you ordered it, not through the text. Report the text with your phone's "report junk" option or forward it to 7726 (SPAM).[3,4]

2. Anyone who asks to be paid with a gift card is a scammer

That's the FTC's rule of thumb, and it has no exceptions: no real business or government agency asks you to buy a gift card and read them the numbers on the back. If it already happened, call the card company right away using the number on the back of the card, ask for a refund, and keep the card and the receipt.[5]

3. Pick a family code word for "emergency" calls

Some scammers now use voice-cloning tools to sound like a relative who "needs money right now and please don't tell anyone." The FBI's 2025 report counted more than 22,000 complaints involving AI, with close to $900 million in reported losses.[2] Agree on a word only your family knows. If a call or message asks for urgent money, hang up and call the person back on the number you already have for them.[5]

4. Shop on sites you typed in yourself

Deals in ads and social posts can lead to copycat stores. Type the store's address yourself or use its official app, look closely at the web address before you check out, and pay with a credit card rather than a debit card. Credit cards generally come with stronger legal limits on what you owe for fraudulent charges, and a debit card draws straight from your bank account.[6]

5. Turn on two-step sign-in for email and shopping accounts

Your email account can reset the password on almost everything else, so protect it first. Turning on multifactor authentication (a code or an app prompt on top of your password) means a stolen password alone isn't enough to get into the account. Then do the same for the stores you buy from most.[7]

6. Add new gifts to your home inventory

New electronics, jewelry and tools are easy to forget if you ever need to list what you own. Take a photo of each item, note the brand, model, serial number and price, and keep the receipt. The free NAIC Home Inventory app can walk you through it, room by room. Keep a copy somewhere other than your house.[8] If you're unsure how your current policy treats high-value items, that's a good question to bring to us.

> **If something already went wrong**
> Report scams to the FTC at ReportFraud.ftc.gov and online crimes to the FBI at ic3.gov. Contact your bank or card company right away about any payment you didn't authorize. Forward scam texts to 7726.

December social pack: 8 posts

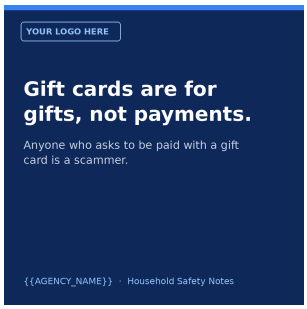

Review each post against your state's advertising rules and any carrier or network social media policy before posting. General safety tips only.

Post 1: Fake delivery texts

Expecting packages this month? So are scammers. Fake delivery texts copy USPS, FedEx and UPS and send you to a look-alike site that asks for a small "redelivery fee." Check tracking on the site or app where you ordered instead, and forward the text to 7726 (SPAM).

Post 2: Gift card payments

If someone tells you to pay a bill, a fine or a "fee" with a gift card, it's a scam. Every time. No real business or government agency asks you to buy a gift card and read them the numbers on the back. If it already happened, call the card company right away and keep the card and receipt.

Post 3: Family code word

Some scammers now use voice-cloning tools to sound like a relative in trouble who needs money fast. A simple fix: agree on a code word only your family knows. If a call asks for urgent money, hang up and call the person back on the number you already have.

Post 6: Home inventory for new gifts

New TV, laptop, jewelry or tools this year? Take a photo, note the model and serial number, and keep the receipt. The free NAIC Home Inventory app walks you through it room by room. Not sure how your policy handles high-value items? Ask us.

Post 7: By the numbers

That's how much people reported losing to fraud in 2025, from about 3 million reports to the Federal Trade Commission, and the FTC says many losses never get reported. The best defense is still the simplest: slow down when a message pushes you to act fast.

Post 8: Where to report

Save this one. Scams: ReportFraud.ftc.gov. Online crimes: ic3.gov (FBI). Scam texts: forward to 7726. A payment you didn't make: call your bank or card company right away. Reporting helps investigators spot patterns and warn others.
